All Plants Dug Fresh and Shipped  
to You

## TO MY FRIENDS AND CUSTOMERS

**I**N presenting this 1924 catalog I wish to extend thanks to you for your patronage, and all orders that you may send me in the future will have my personal attention and will be filled with promptness and dispatch, weather permitting. The fact that each succeeding season finds me with double the customers on my books proves that my plants are giving perfect satisfaction.

**My Guarantee**—I positively guarantee all plants grown by me to be exactly as described in this catalog, fresh, pure, genuine and carefully selected.

## PACKING

All of my plants are tied in bunches of 50. Packed by experienced help in the lightest crates possible. I have shipped plants successfully to all the Southern States, Western States, and most all of the Northern States and some places in Canada. Write your name, address and post-office plainly. You will be notified by mail the day your plants are shipped.

## TERMS

My terms are cash with each order. No plants shipped C. O. D. While I always do all I can to deliver all plants promptly, they are sometimes delayed in transit or lost through no fault of mine. If you do not hear from me in a few days after sending in your order, write me, stating the date you mailed your order and amount sent, together with a list of what you ordered. If your plants should arrive in bad order, pack and the grower and advise me of the shortage and this will be made good at once.

Make all orders payable to P. D. Fulwood, and send by postal money order, express money order, registered letter, or personal check. Do not send stamps.

**P. D. FULWOOD, Tifton, Ga.**

## MY FROST-PROOF CABBAGE PLANTS

**Will Mature Heads Two to Three Weeks Earlier Than Your Home-Grown Plants and Double Your Profits. Why?**

**FLAT DUTCH**

In this section the soil and climatic conditions are just suited for growing tough, hardy cabbage plants during the Winter and early Spring. The plants make a slow but steady growth, until at eight to ten weeks of age they are very tough and hardy. When in this condition they can be shipped to territory farther north and be planted in the open ground a month to six weeks sooner than the home-grown Hot Bed or cold frame plants. These Frost-Proof Cabbage Plants will stand a temperature of 20 degrees above zero without injury. The land freezing, or the plants being covered with ice, sleet or snow after they are planted will not injure them, providing temperature does not go below 20 degrees above zero.

The top of the plant does not grow until your regular Spring weather opens up, but the roots grow from the time they are planted, and just as

soon as spring weather starts the established root growth assimilates the fertilizer in the soil, and the plants grow very fast. You know what the difference in profits will be if your crop is matured and marketed before the general crop from home-grown plants is matured.

I fill orders from September 1st to June 1st.

Varieties—Early Jersey Wakefield, Charleston Large Type Wakefield, Succession and Early Flat Dutch.

Can also furnish Copenhagen Market. Plants very scarce this season. Place your order Early.

SUCCESSION

**FULWOOD'S CABBAGE PLANTS.**

**How to Grow Cabbage.**—To grow a good crop of cabbage I would advise selecting a deep sandy loam with a southern exposure if possible. Apply broadcast from ten to fifteen loads of well rotted stable manure to the acre and plow in. The land should be harrowed thoroughly and rows laid off three to three and a half feet apart. Apply about 500lb of high grade fertilizer to the acre, and mix well with the soil. If you have no stable manure apply from ten to fifteen hundred pounds fertilizer to the acre, half broadcast and half in the drill. As cabbage are gross feeders bear in mind that you cannot fertilize them too heavily. It is important to set the plants deep in the ground, up to the first leaf, in order to keep the stem from freezing and cracking. You can plant about twelve thousand plants of the Wakefields to an acre and about ten thousand of the flat heads to an acre.

The first cultivation should be deep, but when they start to head cultivate them shallow and apply 200 pounds nitrate of soda per acre.

**BERMUDA ONION PLANTS**

Onion plants are much better than sets, as they make larger onions and do not run to seed. They also keep when cured and stored. Land for onions should be manured and fertilized heavily broadcast and plowed in. Rows should be laid off a foot and a half apart and plants should be set from four to six inches in the row. Ready January 1st to May 1st.

Onion Plants Same Price As Cabbage Plants.

**SWEET POTATO SEED**

For those of my customers that wish to bed their own seed sweet potatoes and grow their own plants, I have several thousand bushels of selected seed of the Porto Rico variety and can make shipments by freight or express, as desired, from January until the first of April.

Price of Seed—\$1.50 per bushel.

## SWEET POTATO PLANTS

Grow your own Sweet Potatoes for the finest eating there is. They are immensely popular as a standard crop and no home should be without them.

## FULWOOD'S SWEET POTATO PLANTS

Send us your order for Sweet Potato Plants or Slips as soon as possible. Tell us when you want them shipped and we will send them to you just when you want them or as near that date as conditions will allow. I ship from April until July, the finest plants grown.

My Potato Plants are the finest grown. They are grown from No. 1 seed potatoes only, bedded during February and March, and each crate of potatoes is well dressed in carbolic sulphate before bedding.

Plants are free from disease and Georgia State inspected three times to make sure. To further guard against any disease, we bed on first or second year new ground, and water with purified city water by the Skinner system of irrigation.

Plants remain in dormant or planting condition about one month after being pulled, so you need not worry about delays in transit or your ground not being in proper condition when plants arrive. They can be "heeled" in on arrival if desired, however. Plants are well matured and firm. We believe we bed the finest potatoes and furnish the finest disease free plants of any grower. It will pay you to plant them.

Plant 10,000 plants per acre. They weigh about 15 pounds per 1,000, packed for shipment.

Albion, Ill., Feb. 3, 1923.

Dear Friend:—Send me your prices on Cabbage Plants and Tomato Plants.

I got some of your cabbage plants from a friend last year. They were fine cabbage. Yours,

Amanda May,

Albion, Ill. Route 2.

Tuscola, Ill. R. F. D. 4.

I have used your Frost Proof Cabbage Plants for the past two years. I do not think they can be beat, as plants reach me in good condition and are sure to head. I have recommended them to my friends.

Mrs. F. E. Rideout,

Tuscola, Illinois, R. F. D. 4.

## TOMATO PLANTS

I ship more Tomato Plants than any grower in the plant business, shipping millions of them to canning factories all over the country, as well as to small gardeners and truckers.

Varieties — Greater Baltimore and Livingston Globe.

Tomato Plants are ready from April 1, throughout the summer.

I want to say that I got cabbage and tomato plants from you last year and I never saw such fine cabbage before and the tomatoes just could not be beat.

Mrs. Geo. Nelson.  
Pittsburg, Okla.

Dear Sir:—  
For ten years I have purchased my cabbage plants from you. They have given perfect satisfaction.  
Yours truly,  
Mrs. Maxien Sprinkle,  
Franklin,  
N. C.
